Press Release

Teton Machine Company achieves ISO 9001:2000 Certification

Payette, ID, October 18, 2005: Teton Machine Company, founded in Jackson, WY in 1952 and operating in Payette, ID since 1979 recently achieved ISO 9001:2000 certification. ISO 9001:2000 is a globally accepted set of rules applying to business and manufacturing practices established by the International Standards Organization. In order to achieve certification Teton was required to pass a series of comprehensive audits encompassing all facets of the operation. ISO certification allows Teton to manufacture components for aerospace, defense and other applications that demand stringent quality controls and complete traceability. ISO certification will allow Teton to better serve its existing base of world class clients and will allow Teton to more broadly market its services.
